

CELL SITE ROUTER

AS5915-18X

The Edgecore CSR200 is a compact-sized open cell site gateway platform that provides a combination of 1GE and 10 GE interfaces utilizing merchant silicon and an x86 processor to optimize performance for mobile networks.

The CSR200 is a temperature hardened design, able to operate at a wide operational temperature range from -40°C to 70°C, with built-in power boards and fans in a compact size that provides high availability for mission-critical applications. The CSR200 also supports industry-leading network timing and synchronization in hardware that makes it an ideal for current LTE and emerging 5G mobile backhaul network solutions.

The CSR200 is installed with ONIE (Open Network Install Environment) that provides freedom of choice for the preferred NOS (Network Operating System) integration with user applications.
